

COMMUNITY WORKSHOP

The Rotary Club of Morialta was initially approached in 2008 by local MP Lindsay Simmons and the Morialta Men's Shed, with a request to establish a Men's Shed at Athelstone. We researched the practicality and approached The City of Campbelltown for support. They agreed to allot us land for the project and we planned a building and program involving cash outlay, donations-in-kind and the donated land. The Club then applied for a grant from Community Benefit S.A. So with funds from the Rotary Club of Morialta, City of Campbelltown and the grant the project was finally completed and fitted out with machinery, hand tools, power tools and other equipment.

City of Campbelltown prepared the site; laid the concrete floor and apron; dug the trench for electrical services.

It was decided to call the facility the Community Workshop, opening it up to a broader range of activities within the community. It is situated on Maryvale Road Athelstone behind the Community Hall.

The Club is currently looking for participants and volunteers to run programs for groups within the community.

If there are any wood tradesmen who would like to act as supervisors, please contact Wilf Egen on 0414 969 213.
