contribution or donate supplies to assist the medical team,
Contact Sally Platt 770-579-1315 or seplatt@cs.com**

Fast Facts about the Mission

Nairobi is home to one of the largest populations of children orphaned due to the HIV/AIDS epidemic. Most of them live in extreme poverty in child-headed or adolescent-headed households or with grannies who have no means of supporting them.

Education is the only way out of poverty, but unless they are well enough to attend school, that opportunity is lost.

As well, many of these children have only one meal a day, which they receive at school. So keeping them in school is very important.

During this mission, the children will be screened and treated by pediatricians, dentists and eye care professionals. They will also receive health education, including proper hand washing, tooth brushing and HIV/AIDS prevention information.

Both Rotarians and non-Rotarians can join the mission team. Kenyan medical professionals and non-medical volunteers will work with us.

Please prayerfully consider joining us or making a contribution to assist our work with these kids.

They are depending
on us!
Call or e-mail today
for information.

THANK YOU!
