Bowelscan is a public awareness program that increases community knowledge of bowel cancer and its symptoms as well as the distribution of faecal occult blood testing kits to facilitate early diagnosis.

The aims of the Bowelscan program are to:

- Enhance public awareness of the need of bowel cancer screening;
- Promote and coordinate the Bowelscan program annually; and
- Emphasise the importance of the importance of bowel cancer screening for men and women over the age of 40.

Bowelscan is a not-for-profit initiative. The successful operation of Bowelscan, and its accessibility to a wide range of people, is made possible by the voluntary support of a large number of pharmacies, pathology laboratories and Rotary members. We thank all involved for their contribution.

Learn <>Grow

Coordinator:

AG John McKenzie 63665000 0402018318 (Fayah) Orange North

Learn <>Grow helps people in developing countries learn about and grow the best local foods to match their nutritional needs

Learn<> uses a database of agronomic information and nutritional value of edible plants to inform and train communities about local edible plants.

Your Club can support the program by running a *Food for Thought* meal.
